PROFESSIONAL SUMMARY

Recent bachelor's degree recipient with a background in Mathematics and Computer Science and specialized in Frontend Development. Currently holds over 3 years of experience in structuring, maintaining, and implementing responsive websites for the ecommerce and educational industries. Proficient in HTML5, JavaScript, jQuery, CSS, Sass, Bootstrap, React.js, Vue.js, WordPress and Magento.

Languages: English (Advanced), Spanish (Native).
Work Authorization: Canadian Permanent Resident with valid work authorization.

WORK EXPERIENCE

Front End Developer (Volunteer)   April 2022 – Present
Sovereign Prime • Ottawa, Canada

• Collaborating on the Front-End team to create an application called RISE with the use of React, Reactstrap, CSS, Sass, and HTML5. RISE will have a customized blockchain that will allow the creation of a decentralized marketplace, a messaging app and a cryptocurrency based universal basic income.
• Integrating substrate with the Front-End React application through the polkadot.js API.
• Assisting/onboarding other developers that join the organization and coordinating the continuous integration of changes and new features through GIT.

Front End Developer   Nov 2019 – April 2022
Agile Thought • Mexico City, Mexico

• Created multiple landing pages and components for Dolce Gusto's e-commerce website in Magento, transforming wireframes to web pages with the use of Bootstrap, CSS, Sass, JavaScript, jQuery and HTML5.
• Collaborated with a Back End Developer to integrate a React page in Magento that shows the nearest collection points for their capsule recycling program.
• Assessed UI designs and prototypes for technical feasibility.
• Created multiple countdown timers for marketing campaigns with JavaScript. These timers showed limited time promotions and increased sales significantly.

Web Developer   May 2018 - Jun 2019
(Internship) UNAM-Canada • Gatineau, Québec

• Created an intranet site using WordPress. This site centralizes important information providing fast and easy access to it and makes collaboration easier.
• Administrated and maintained the corporate WordPress website, managing user permissions and roles and using strategies to improve the SEO.
• Provided training to end users and content managers for both websites and created user and system documentation.

EDUCATION

Applied Mathematics and Computer Science, Bachelor   Jul 2014 - May 2018
National Autonomous University of Mexico (UNAM) • Mexico
   Graduated Cum Laude

COURSEWORK

Front-End Development with react (Jan 2022)
(The Hong Kong University of Science and Technology - Coursera)

- Developed skills in React.js, such as implementing single page applications using various React features including React components, Reactstrap and React router, creating and validating forms, creating the architecture for a React-Redux application, using Fetch and the REST API for client-server communication, testing, building, and deploying React applications.

PROJECTS

Seenapse   Oct 2021 - Nov 2021

- Generated the necessary React components for a new feature that allows registered users to get AI generated ideas, with the use of React forms, and components that render the results of a query to the AI API.

Sidetrack   June 2021 - August 2021

- Collaborated with other developers and designers to build Sidetrack's website with WordPress.
- Integrated plugins to make the site bilingual and to improve the performance and security.

Acaguate   April 2021 - May 2021

- Collaborated with other developers to add a new feature that allowed restaurants and establishments to upload new discounts and promos. This web app was created with Vue.js.
